MealDirect

₦300
FLAT DELIVERY

CAMPUS AMBASSADOR PROGRAMME

Feed your campus. Lead the movement.

Your guide to what MealDirect is, why students love it, and exactly what you do as the person who brings it to your campus.

What MealDirect is | Your role | Your referral code | Daily & weekly duties | First 30 days | The pitch | Code of conduct

Ambassador: _____ Campus: _____ Start date: __ / __ / ____

WELCOME ABOARD

You are the face of MealDirect on your campus

00

Students won't trust an app until they trust the person who told them about it. That person is you. This guide gives you everything you need to explain MealDirect clearly and do the job well.

THE SHORT VERSION

What you are signing up for

A **Campus Ambassador** is a student who grows MealDirect on their campus. You get students signed up with your referral code, help them place their first order and top up their wallet, and get them ordering again. You also pass on what students are saying to the campus team.

You are not customer support, a rider or a cashier. Your job is to bring people in and help them get started. When something goes wrong, you **pass it to the campus team** instead of trying to fix it yourself.

Inside this guide

01 **What is MealDirect?**
The idea, the batch model, who does what

02 **How it works for students**
Ordering, fees, wallet, tracking, refunds

03 **Your role**
Mission, responsibilities, how you're measured

04 **Your referral code**
The one rule you must never get wrong

05 **What you do, and when**
Service-day clock, weekly routine, first 30 days

06 **The pitch**
Scripts, talking points, objections

07 **Code of conduct**
Do's, don'ts, escalation

08 **Rewards & quick reference**
Your targets, contacts, sign-off

₦300
Flat delivery fee on every standard order

4
Simple order states anyone can follow

1
Bank account number per student wallet, for top-ups

>40%
Repeat-order target. This number matters more than any other

About the naira figures in this guide

All amounts shown are MealDirect's standard default settings. Your campus team can change fees per campus or zone. Check the live numbers in the app before you print them on a poster or quote them in a group chat.

PART ONE

What is MealDirect?

01

MealDirect is a food-ordering app built only for campuses. Students order ahead for a set meal time, the vendor cooks everything at once, and one rider delivers the whole batch.

THE PROBLEM

Campus food is a daily headache

Long queues between lectures. Walking across campus in the heat. Delivery apps that charge too much, arrive late, or won't come past the gate. Vendors who either run out of food or end up throwing it away.

THE FIX

Scheduled batch delivery

Students order before a **cut-off** for a fixed meal time like Lunch at 1:00 pm. Every order for one vendor, one meal time and one zone becomes a single **batch**. The vendor cooks exactly that many plates, and one rider delivers all of them in one trip.

THE MODEL IN ONE PICTURE

Why it's cheap and on time

Many orders share the cost of one trip. That is why delivery can be a flat ₦300 and still pay the rider.

THE FOUR WORDS STUDENTS WILL HEAR

How the campus is organised

WORD	WHAT IT MEANS	EXAMPLE
Zone	A delivery area inside the campus. Each batch belongs to one zone.	North Hostels · Academic Core
Location	The hostel or department a student picks as their drop point.	Queen Amina Hall · Faculty of Law
Delivery slot	A promised meal time, with a cut-off when ordering for it closes.	Lunch · delivers 1:00 pm
Cut-off	How long before the meal time ordering closes. Late orders go to the next slot.	90 min → lunch orders close at 11:30 am

THE ECOSYSTEM

Who does what

S

Students & staff

Order before the cut-off, pay by wallet or card, track the order, leave a review after delivery.

V

Vendors

Keep their menu and daily availability up to date, cook the batch, and tap **Ready** once. Paid daily.

R

Riders

Pick up the batch, confirm whether the food was ready on time, and deliver it to the zone.

A

Campus team

Admins run the campus: zones, meal times, vendors, riders, refunds, problems and payouts.

★

You, the Ambassador

Bring students in, help them through their first order, keep them coming back, and pass on feedback.

P

Platform

Runs the app, payments (through Paystack), notifications and the systems behind them.

PART TWO · KNOW IT COLD

How it works for students

02

You'll be asked these questions many times. If you can explain this page from memory, you can handle almost any conversation.

THE STUDENT JOURNEY

From signup to first meal

1. **Sign up and enter a referral code (yours)**
   Email or phone, then verify the code they receive. The referral code must be entered **during signup**. See Part 4.
2. **Pick campus and usual location**
   Their hostel or department. This sets their zone and which batch their orders join.
3. **Turn on notifications**
   This is how they find out the food is ready and the rider is on the way.
4. **Choose the meal time first, then the food**
   Pick the date and slot (e.g. Lunch · 1:00 pm). The app only shows vendors and items available for that slot.
5. **Build the plate**
   Quantities, soup choice where needed, extras like spoons of rice, protein and drinks. They can add a short note ("no pepper").
6. **Choose where it's delivered, then pay**
   Standard drop point, or point delivery to a room or class for ₦100 more. Pay from the wallet or by card. An order only counts once it's paid.

> **The cut-off is strict**
>
> Each meal time closes a set time before delivery (usually 90 minutes for lunch). After that, students have to order for the next slot. An order left unpaid past the cut-off expires on its own. No food, no charge. Remind people **before** the cut-off.

WHAT STUDENTS PAY

The bill, line by line

LINE	DEFAULT	WHAT IT IS
Food subtotal	varies	What the vendor charges for the items picked.
Delivery fee	₦300	Flat per order, split between the rider, the vendor and the platform.
Point delivery	+₦100	Only if they want it brought to a specific room, class or office.
Service fee	₦200	Platform fee, capped per campus.
Discount	− varies	A valid promo code, shown in the total before paying.
Large-order surcharge	1.5% + ₦100	Only on totals above ₦2,490. Group orders are still allowed. The student just ticks a box to accept the surcharge.

THE WALLET

The feature to show off

Every student gets a MealDirect wallet with **their own bank account number** (through Paystack). They transfer money to it from any Nigerian bank app and their balance goes up. No card, and no typing card details every time they order.

- ✓ **Top up**: Wallet → copy account number → transfer
- ✓ **Pay**: choose Wallet at checkout; the app shows any shortfall
- ✓ **Refunds**: go straight back into the wallet
- ✓ **Ledger**: every movement is listed, so it's easy to prove what happened

AFTER PAYING

The four order states

`paid`
The vendor has the order on their list.

`ready`
Cooked and packed, waiting for the rider.

`out_for_delivery`
The rider has the batch and is on the way.

`delivered`
Handed over. Reviews open now.

Batch group chat

Each batch has a chat with the other students on the same run, the vendor and the rider. Students are shown under nicknames, so no names or phone numbers are visible.

Hand-off code

The rider may ask for a hand-off code. Students should only show it once the food is in their hands.

Problems & refunds

Wrong, missing or cold food, or nothing delivered? They report it on the order. Approved refunds go to their wallet.

PART THREE

Your role as Campus Ambassador

03

Your goal is to get students ordering and keep them ordering. Every responsibility below supports that.

> Get every student on your campus to their **first order**, and make that order go so well that they place a **second one**.
>
> Your mission in one sentence

YOUR FIVE CORE RESPONSIBILITIES

What you are accountable for

1

Grow signups with your code

Get students signed up with **your referral code entered at signup**. Use hostels, departments, fellowships, clubs, sports teams and class group chats.

2

Turn signups into first orders

A signup that never orders doesn't count for much. Help new users top up their wallet, find their meal time and place an order before the cut-off.

3

Drive repeat ordering

Remind people before each cut-off, share promo codes from the campus team, and check in after a student's first order.

4

Be the feedback channel

Collect what students say: missing food, hostels with no signs, slow vendors, confusing screens. Send a short weekly report to the campus lead.

5

Represent the brand well, and scout for the team

Be visible, friendly and honest. Run stands and promotions at orientation and events. Pass leads to the campus operations team: kitchens students already trust, and reliable students with bikes who could be riders. **You suggest them; the campus team does the onboarding.**

HOW YOU'RE MEASURED

The numbers that count

MealDirect tracks each referral code. The campus team can see how many people you referred, **how many of them paid for an order**, how many orders they placed and how much they spent. Paying users count far more than signups.

METRIC	WHAT IT MEANS	WHY IT MATTERS
Referred users	Students who signed up with your code	Your reach. It's a starting point, not the goal.
Paying referred users	Referred students who paid for at least one order	**Your headline number.** It shows real people who actually ordered.
Paid orders	Total paid orders placed by your referrals	Shows whether they keep ordering.
Total spent	Naira spent by your referrals	The value you have brought to the campus.
Feedback reports	Weekly notes sent to the campus lead	Fixing problems early keeps students ordering.

PART FOUR · READ TWICE

Your referral code

04

Every MealDirect user has a personal referral code, including you. It's how your work is tracked. One rule decides whether a referral counts.

The golden rule: the code must be entered during signup

A referral code only works **before the student finishes setting up their profile**. Once their profile is complete, they can never add a code. If a friend signs up first and plans to add your code later, that referral is lost. Always get them to enter your code **on the signup screen**.

STEP BY STEP

Getting your code

1. **Create your own MealDirect account**
   Use the customer app like any student. You need to know the app well before you can teach it.
2. **Open your referral code in the app**
   It's unique to you and is created automatically.
3. **Put it everywhere**
   WhatsApp status, bio, flyers, a QR code at your stand. Make it short and easy to remember.

STEP BY STEP

Signing up a friend

1. **Open the app on their phone with them**
   Signing up together works much better than "I'll send you the link."
2. **Enter your code on the signup screen**
   Before they finish setting up their profile. Check it's correct.
3. **Set campus, location, notifications**
   Their hostel or department, plus push notifications.
4. **Show them the wallet**
   Point out their account number and how to transfer to it.
5. **Find tomorrow's meal time together**
   Show them the slot and cut-off, so their first order isn't late.

Each person uses a code once

A student can redeem one referral code, one time. They can't change it later.

You can't refer yourself

Your own account can't use your code. Only real students count.

Paying users are what count

Fake or empty signups show up as referrals who never paid. They don't help you, and they get noticed.

PART FIVE · YOUR ROUTINE

What you do, and when

05

Your routine follows the meal times. Timing matters most just before the cut-off, so plan your day around it.

A SERVICE DAY

The ambassador clock (example: Lunch at 1:00 pm, 90-min cut-off)

Morning 8–10 am	**Get people thinking about lunch** Post today's highlights (vendors, any promo code from the campus team) in your hostel and class group chats. Mention the cut-off time.
Cut-off – 60 min ~10:30 am	**Send the reminder** "Lunch orders close at 11:30." This one message brings in more orders than anything else you'll do today.
Cut-off – 30 min ~11:00 am	**Help people who are stuck** Help anyone with an empty wallet or a first-time order before the slot closes.
Cut-off 11:30 am	**Ordering closes** Anyone who missed it orders for the next slot. Tell them which one and when it closes.
Delivery ~1:00 pm	**Be around if you can** Be near a busy drop point. Point confused students to the batch chat. Note any problems you see.
After service afternoon	**Follow up** Message first-time orderers: "How was it? Leave a review." Write down complaints for your weekly report. Pass serious problems to the campus team the same day.

Every week

- [ ] Hit your weekly target for new **paying** referrals
- [ ] Visit at least two new groups (hostel block, club, department)
- [ ] Post at least three times in group chats and on WhatsApp status
- [ ] Check on everyone you referred who hasn't ordered yet
- [ ] Send the weekly feedback report to the campus lead
- [ ] Join the ambassador check-in call or meeting

Your weekly feedback report: five lines

- [ ] **Numbers:** new referrals, new paying referrals
- [ ] **What students love**: what's working
- [ ] **What students complain about**: with order details if possible
- [ ] **Leads**: kitchens or potential riders worth contacting
- [ ] **One idea** for next week

YOUR FIRST 30 DAYS

From day one to fully up and running

WEEK 1
Learn it

- Read this guide twice
- Create your account and place 2–3 orders yourself
- Top up your wallet by bank transfer
- Get your referral code and save the campus contacts
- Learn the zones, drop points and meal times

Done when: you can explain Part 2 without notes

WEEK 2
Your circle

- Sign up your roommates, coursemates and close friends in person
- Get each of them to a first order
- Post in your hostel and class group chats
- Write your first feedback report

Target: _____ paying referrals

WEEK 3
Go wider

- Set up a stand at a busy spot or event
- Talk to 2–3 clubs, fellowships or teams
- Suggest kitchens or riders to the campus team
- Start daily cut-off reminders

Target: _____ paying referrals

WEEK 4
Repeat orders

- Follow up everyone who ordered only once
- Run a group-order push (e.g. a hostel lunch day)
- Review your numbers with the campus lead
- Agree targets for next month

Target: >40% of referrals order twice

IDEAS THAT WORK

Your growth toolkit

Signup stands

Busy spot, phone in hand, QR code to the app, your code on a big card. Sign people up on the spot.

Hostel lunch days

Get one hostel block to order from the same slot. Everyone gets their food at the same time.

Exam-season pushes

"Don't leave the library. Lunch comes to you." Point delivery to study spots works well here.

Promo codes

Only share codes the campus team gives you. Students see the discount before they pay.

PART SIX

The pitch

06

Short, honest and focused on what students care about: cheap, on time, and no queue. Adjust it to your own style, but keep the facts accurate.

> "You know the lunch queue between lectures? Skip it. On MealDirect you order before 11:30, pay from your **own wallet account number**, and your food arrives at your hostel at 1. Delivery is a **flat ₦300**. Put my code in when you sign up, and I'll help you place your first order now."
>
> The 20-second version · swap in your campus's real times

Cheap

Flat delivery fee because one rider carries many orders. No surge pricing.

On time

Food is cooked for a set meal time, not "whenever". Riders are paid more for delivering on time.

Safe & simple

Wallet top-up by bank transfer, refunds back to the wallet, and nicknames in group chats.

OBJECTION HANDLING

What students will ask, and what to say

THEY SAY	YOU SAY
"Why can't I order lunch right now?"	Ordering for that meal time has closed. That's how the vendor knows exactly how much to cook. Let's order for the next slot.
"I don't have a card."	You don't need one. Your wallet has its own account number. Transfer from your bank app and pay with the wallet.
"I transferred money and my wallet is empty."	Bank transfers can take a few minutes. Check the wallet history. If nothing shows up, contact support with the transfer reference. Don't send money again.
"I paid but it says unpaid."	Don't pay twice. Support will check the payment and sort it out. I'll pass it on now.
"My order is over ₦2,490 and won't go through."	Big orders are allowed. Tick the box to accept the large-order surcharge (1.5% + ₦100) and it will go through.
"What if the food doesn't come or it's wrong?"	Report a problem on the order in the app. The campus team reviews it, and approved refunds go straight back to your wallet.
"Can I add your code later?"	No. It only works during signup. Let's do it now.
"Will other people see my number in the group chat?"	No. Students show up under nicknames. Nobody sees your name or number.

PART SEVEN · NON-NEGOTIABLE

Code of conduct

07

Students trust MealDirect because they trust you. These rules protect them, the brand and you.

Always

- ✓ Be honest about fees, times and cut-offs, even when it costs you a signup
- ✓ Let students type their own details on their own phones
- ✓ Send problems to the campus team the same day
- ✓ Use only promo codes and materials the campus team gave you
- ✓ Respect university rules on where you can promote and set up stands
- ✓ Treat vendors and riders as teammates, because they are
- ✓ Keep any student information you see private

Never

- ✗ **Take cash** for an order. Every order is paid in the app
- ✗ Ask for or handle anyone's **password, OTP, PIN or card details**
- ✗ Ask for a student's hand-off code, or share your own
- ✗ Make fake accounts or pay people to sign up and do nothing
- ✗ Promise refunds, discounts or free food the campus team hasn't approved
- ✗ Speak to the media or the university administration on MealDirect's behalf
- ✗ Run down other vendors, riders or competitors in public

Money safety

If someone offers to "just pay you directly", or asks you to pay for them and they'll pay you back, say no. Point them to the app and their wallet. Report anything that looks like a scam to the campus team straight away. Any account caught gaming referrals will be removed from the programme.

WHEN SOMETHING GOES WRONG

Your escalation path

Student reports it — Ask them to "Report a problem" on the order in the app

→

You note it — Order details, time, what happened. Screenshot if possible

→

Campus team — Support / campus admin handles refunds and fixes

→

You follow up — Check the student got a response

You flag problems. The campus team fixes them.

Refunds, payment problems, wallet corrections, cancelled orders and rider or vendor issues are handled by admins with the right access. Every action they take is logged. Your job is to make sure the problem reaches them quickly with clear details.

PART EIGHT

Rewards & quick reference

08

Fill this page in with your campus lead on day one, then keep it on your phone.

AGREED WITH YOUR CAMPUS LEAD

Your targets & rewards

ITEM	AGREED
Monthly target: paying referrals	
Reward per paying referral	
Bonus for hitting target	
Repeat-order bonus	
Perks (merch, credit, certificate)	
Paid on / via	
Review date	

Rewards are based on the referral numbers in Part 3. Paying referrals are what count, not signups.

SAVE THESE NOW

GLOSSARY

Words you'll use every day

Batch	All orders for one vendor, one meal time, one zone and one date. The rider delivers it in one trip.
Cut-off	When ordering closes for a meal time, a set number of minutes before delivery.
Delivery slot	A promised meal delivery time, e.g. Lunch at 1:00 pm.
Zone / Location	A zone is a delivery area. A location is the student's hostel or department drop point.
Point delivery	Delivery to a specific room, class or office for an extra ₦100.
Wallet / Ledger	A student's MealDirect balance, with its own account number for top-ups. The ledger lists every movement.
Referral code	Your personal code. It counts only if entered during signup, before the profile is complete.
Paying referral	Someone who signed up with your code and paid for at least one order. This is your main number.
Escalation	A reported problem on an order, handled by the campus team, sometimes with a refund.

MealDirect

Welcome to the team.
Let's feed your campus.

Every student you help through their first order is a student who stops queuing between lectures. Thank you for leading this on your campus.

1. I have read this guide and understand how MealDirect works.
2. I will always get my referral code entered **during signup**.
3. I will never take cash or handle anyone's passwords, OTPs or card details.
4. I will pass every problem to the campus team the same day.
5. I will send a short feedback report every week.

Ambassador signature & date

Campus lead signature & date
